Non-Residential civil construction

School Infrastructures

This is an area of high specialisation for the Elevo Group. The construction of school buildings has formed part of the curriculum of this Group over various decades, matching the investment effort Portugal has made, over the years, in the improvement of the school network. The wide range of competencies held in this area have enabled the Group to intervene at all the educational levels and to develop the most modern projects, benefitting from work that is constantly improving, that offers clients constant up-to-date know-how.
