Non-Residential civil construction

Cultural and Sports Infrastructures

Public and private investment in new cultural and sports infrastructures increased significantly over the last few years and has already attained a significant level in new geographies. The Elevo Group has been participating in this modernisation effort in various markets, intervening directly in large-scale projects. This is the opportunity to materialize projects signed by renowned architects and to add its name to a common movement that aims to improve the availability conditions of public and leisure areas.

Belém Cultural Centre
