Engineering

Railway and Metro Infrastructures

The ELEVO Group curriculum includes the construction of underground and aboveground lines as well as the construction of various metro stations. The complexity of the projects assumed required the technical team responsible to increase its know-how to a level way above the average, placing the entire ELEVO Group today in a prominent position in terms of technical competency in these types of projects.

Oriente Station

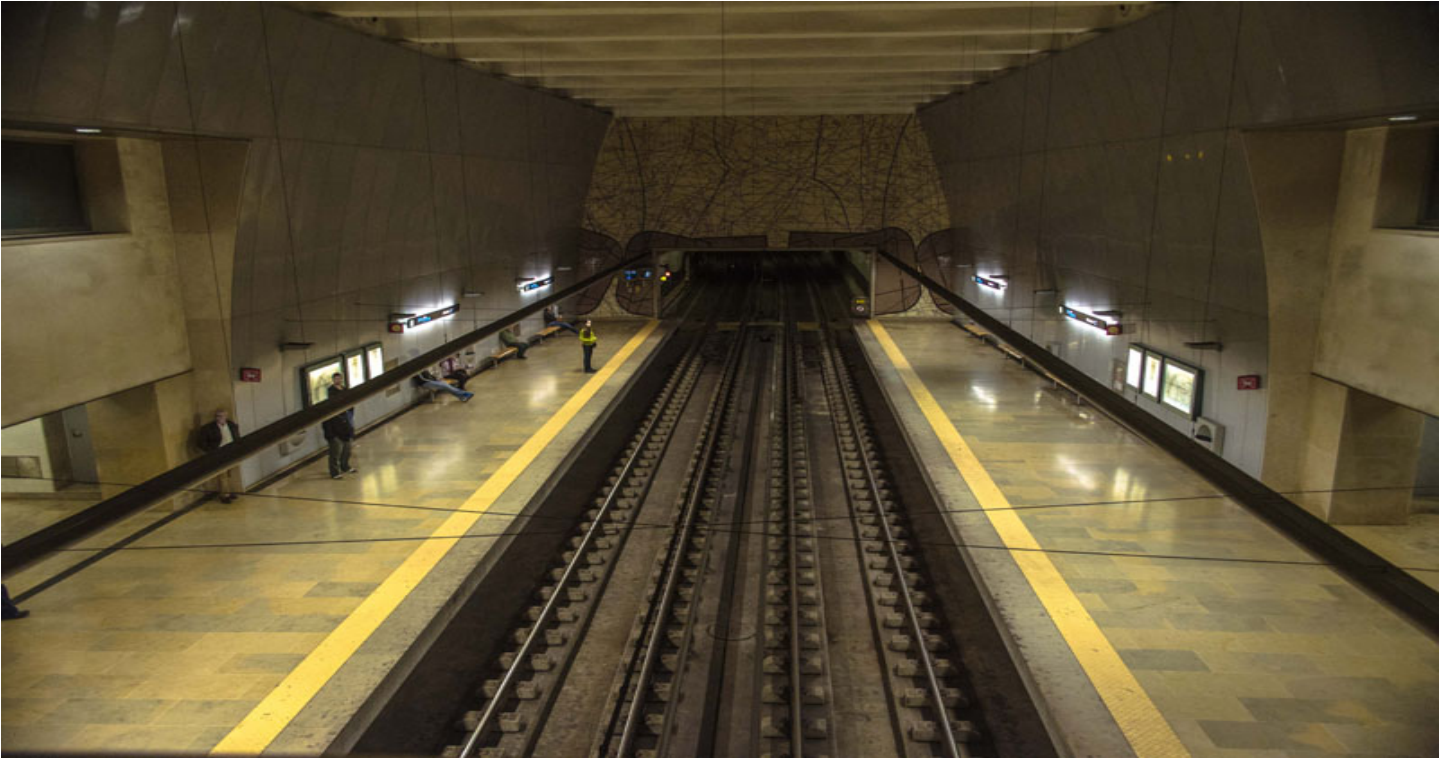

Setúbal Station

Lisbon Metro - Yellow Line

Northern Railway Line

Alfornelos Station

Construction of the Gondomar line
