Dam and Maritime Works

The ELEVO Group curriculum includes various hydraulics works executed in Portugal, with particular incidence on earth and rock-fill dams and large diameter irrigation networks. Of particular prominence in its curriculum are the construction of the largest number of earth and rock-fill dams for the State company EDIA, as well as the respective large diameter irrigation networks and the supply and assembling of pumping stations.

Odelouca Dam

Amoreira and Brinches Dams

Pretarouca Dam

Sabugal Dam

Penedrão Dam

Sambade Dam

Serpa Dam

Abrilongo Dam

Salineiro Dam

Faveta Dam

Saquinho Dam
