The Elevo Group curriculum includes the construction of underground and aboveground lines as well as the construction of various metro stations.

The complexity of the projects assumed required the technical team responsible to increase its know-how to a level way above the average, placing Elevo Group today in a prominent position in terms of technical competency in these types of projects.

Elevo Group has actively participated in the National Plan for Water Treatment and Sewage for Águas de Portugal and for the municipalities, sometimes on the construction, but most often on the designing and building of the Water and Wastewater Treatment Plants. The experience accumulated of the Group throughout the years has enabled it to cater to a capacity of up to 1.300.000 equivalent inhabitants, as is the case with ETAR in Marrakech. It is this accumulated experience and the effort made in all our projects that enable us to have a level of knowledge that is unique in this area, which places us in a privileged position anywhere in the world in approaching works of this nature.

HOSPITAL AND HEALTHCARE INFRASTRUCTURES

We have been accumulating experience since the seventies in constructing some of the largest healthcare facilities in Portugal. It is these decades of work that today make Elevo Group one of the Portuguese companies with the most extensive experience and know-how in the domain of design, project execution and construction of hospital facilities, all of these conceived and executed in light of the most evolved techniques and processes. Assuming itself as a reference at the national level, Elevo Group has earned on its own merits a prominent place amongst the best European top constructors in this market segment.

HOTEL AND TOURISM FACILITIES

As a leader in the construction of hotels in Portugal, Elevo Group has already exceeded the construction of 10.000 rooms, constructing at a certain point in time in more recent years, one hotel per quarter. It counts on an impressive past that leads many investors to elect this Group as the specialised partner in the construction of tourism developments. Today, with an ambitious positioning in highly competitive markets, Elevo Group guides its activity along the most stringent rules of functionality, comfort and the best quality for various solutions. Africa has started to receive the first Group interventions in this segment and currently represents a market with a high growth potential.

OFFICES AND SHOPPING CENTRES

A wide range of clients have selected Elevo Group to build their new office buildings and shopping centres. We seek to be worthy of that trust by repaying them with quality, flexibility and operability. On national or international territory, Elevo Group is able to respond to the challenges at hand with innovative methods and solutions allied to the high technical capacity of its permanent employees.

CIVIL CONSTRUCTION

INDUSTRIAL TECHNOLOGICAL FACILITIES

The know-how accumulated over the years by Elevo Group in the construction of technological centres and industrial facilities on national territory is already invaluable. These were complex projects, requiring the involvement of high-level technical means and capacity which therefore imposed an operational management of excellence. But it is also these projects that require us to attain technical and professional levels that are not easily replicated and that position Elevo Group at a highly competitive level.

SCHOOL INFRASTRUCTURES

This is an area of high specialisation for Elevo Group. The construction of school buildings has formed part of the curriculum of this Group over various decades, matching the investment effort that Portugal has made over the years in the improvement of the school network. The wide range of competencies held in this area have enabled the Group to intervene at all educational levels and to develop the most modern projects, benefitting from work that is constantly improving and that also offers clients constant up-to-date know-how.

CIVIL CONSTRUCTION

INSTITUTIONAL BUILDINGS

The construction of social headquarters and institutional buildings is a demanding challenge to which Elevo Group actively rises. For this reason, the Group's portfolio is enriched with buildings that reveal this specific positioning of our activity and the status of the organizations that select us to construct their "home". In each building there is a story, a preparation and a careful analysis to guarantee that the entire volumetric presence is conjugated with a refined occupation of the space.
