## Non-Residential civil construction

### Hotel and Tourism Facilities

Leader in the construction of hotels in Portugal, the Elevo Group has already exceeded the construction of 10.000 rooms, constructing, at a certain point in time in more recent years, one hotel per quarter. A glowing past that leads many investors to elect this Group as the specialised partner in the construction of tourism developments.

Today, with an ambitious positioning in highly competitive markets, the ELEVO Group guides its activity along the most stringent rules of functionality, comfort and the end quality of the various solutions. Africa has started to receive the first Group interventions in this segment and currently represents a market with a high growth potential.
