Specialised Activities

Foundations and Geotechnics

With a vast experience of over 40 years of activity, always based on innovation and pioneering, Tecnasol represents the area of Foundations and Geotechnics.

In the area of foundations, Tecnasol makes use of the latest executive methods and equipment for all types of structures, ranging from the smallest building to the most complex bridge. In the field of geotechnics, it performs a set of survey works, land prospecting and testing, which involves not only the performance but also the planning and interpretation of results.
